

Protect Your Product and Maintain Compliance From Seed to Sale

Security and risk advisory for cannabis facilities

ADT Commercial provides end-to-end integrated solutions, including access control, intrusion detection, video surveillance, secure cash handling systems, fire alarm and suppression, and life safety protection. With a constantly evolving regulatory landscape, exponentially increasing demand, and growth outpacing technology, the cannabis industry needs One Ideal Partner that can help mitigate risk and maintain compliance.

Security that grows with you

Leveraging our product portfolio, knowledge and experience as leaders in pharmaceuticals, healthcare and retail markets, our customers have access to a national company with local offices delivering exceptional service. ADT Commercial is at the forefront of regulatory compliance, ensuring our solution sets are effective and reflect industry best practices.

Security coverage from seed to sale

Compliance is critical in a growing industry

It can be challenging to keep up with changing regulations—and being out of compliance can result in costly fines. From dispensaries to cultivation facilities, manufacturing plants to testing labs, we offer tailored security solutions for every aspect of these unique businesses.

Layers of security help mitigate multiple risks

Cannabis facilities present the unique security challenge of not only securing assets and locations, but also helping protect employees and customers. Often these are cash businesses which face additional risk. ADT Commercial offers multiple layers of fire, life safety and security to help protect your business.

RISK CONSULTING

Our Enterprise Security Risk Group can advise you on critical decisions and strategy, align your organizational risks with your business goals, measure and improve your organizational strength and maximize your investments of critical system components.

INTRUSION ALARM SYSTEMS

We offer the latest intrusion alarm systems, including indoor and outdoor sensors, monitoring, integration with video surveillance, remote management, and both wired and wireless panic buttons. Our ADT Commercial team delivers years of experience and customer service excellence 24/7/365.

SAFES, CABINETS AND LOCK

We offer laboratory and under-counter options, as well as relocking, programmable and no-key safes to help prevent both internal and external theft.

CASH HANDLING SOLUTIONS

Premier cash handling solutions, including ATMs, ITMs and cash recyclers, help to ensure smooth retail operations and customer satisfaction.

ACCESS CONTROL

Control access and entry with a standalone access control system or as an integrated element in a comprehensive security management solution. We provide the very latest in biometric options as well as license plate recognition. Ensure your high-security spaces are only accessible to authorized employees to protect your assets.

FIRE DETECTION AND ALARM

ADT Commercial provides everything from a four-zone panel to a large networked system for fire, carbon monoxide, smoke, heat and gas detection. Our fire doors and dampers can also help contain a fire to prevent greater damage.

VIDEO SURVEILLANCE

IP camera technology provides a 360° view of your business on a 24/7 basis to help protect your assets with on-site or remote video storage. You can monitor entries, store areas, parking and delivery—either on-site or through cloud solutions. We offer remote guard services with a trained professional monitoring your facility and can help assist a faster response from law enforcement.

The National Strength You Want. The Local Knowledge You Need.

We are committed to delivering the latest technology with customer service excellence. We are your One Ideal Partner for cannabis security and compliance.
