Tailored solutions to meet your requirements

Clinical communications/nurse call

Integrated solutions unite clinical information and workflows between systems, caregivers and devices to connect nurse call, mobile communications, digital patient care boards, audio and video analytics, fall prevention, alarm management and reporting.

Real-time locating systems (RTLS)

RTLS provides a platform for multiple use cases including automated and real-time staff and asset tracking, contact tracing, clinical workflow integration, environmental monitoring and hand hygiene compliance.

Virtual patient observation/telehealth

Virtual rounding, virtual consultation, remote patient observation, family visitation, e-sitters and falls management solutions enhance patient care and satisfaction and can help increase HCAHPS scoring.

Wander management

Safeguard your residents and patients with a reliable and flexible wander management system to alert caregivers and secure egress, stairways and elevators when a resident wanders from a protected area.

Infant protection

Provide a safe and secure environment for newborns and pediatric patients with integrated security, access control and video surveillance solutions that can help avoid abduction attempts and ensure mother-baby matching.

Worker safety

Hospitals are experiencing an increasing number of violent incidents. We can help address these issues with audio and video analytics, video surveillance, access control, duress and panic solutions.

The National Strength You Want. The Local Knowledge You Need.

You can rely on us to be your One Ideal Partner for integrated solutions that help you reduce costs, mitigate risks and protect your people, property and assets.

MAKE THE RIGHT CHOICE

▶ **Innovate with expert advice**
Benefit from decades of enterprise-level industry experience, custom designs and specialized training
